DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: page 1, the status of the related application 09/918,430 should be updated, i.e. --now U.S. Patent No. 6,698,980--.

Appropriate correction is required.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-18 are rejected under the judicially created doctrine of obviousness-

type double patenting as being unpatentable over claims 1-8 of U.S. Patent No.

6,698,980 in view of Fergusson #5,885,034. Mongrain discloses the claimed invention except for the nut body having convex hemispherical portion and a domed bearing plate. Fergusson teaches that it is known to provide an anchor bolt system including a nut having a convex hemispherical portion 6 and a domed bearing plate 4 as set forth at column 1, lines 5-17. It would have been obvious to one having ordinary skill in the art

at the time the invention was made to provide a nut body having convex hemispherical portion and a domed bearing plate, as taught by Fergusson in order to facilitate support of a mine roof.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
